

I would like to request that the LPFM stations would not be given priority over current FM translator service. I listen to K-LOVE in New Mexico (90.5) even though it is out of California. It is a positive, family-oriented station unlike any in the area. The music is contemporary Christian, and is different from other local Christian stations. I support this station financially because it is so important to me. It is an uplifting, encouraging station without commercials. It would be very disappointing to me personally to lose this station. They provide a service in the type of music, reporting, and encouragement they broadcast.
